

Bulk Service Solutions

CASE STUDY:

CLIENT PROFILES

An international purveyor of specialty meats with a processing plant adjacent to residential properties.

OPERATIONAL CHALLENGE

The facility's liquid chemicals were supplied in drums and totes, which posed numerous challenges: moving heavy drums, excess on-site inventory, direct handling of chemicals by workers or vendors, risk of spillage, and potential leakage through chemical feed equipment.

CHEMICAL SOLUTION

Kroff Chemical Company, Inc. engineered a solution whereby personnel no longer transport large containers and handle liquid chemicals. Also, facilities are no longer used for storage of liquid chemicals, improving overall cleanliness and eliminating the risk of spillage and leakage.

BOTTOM-LINE RESULTS

Kroff provided, registered and installed the chemical storage tank at no cost to the facility. Cost savings to the facility as a result of going from totes to bulk was a savings of \$110,000 a year. Also, the chemical storage program has improved aesthetic value, safety and environmental impact.

Before

After

Kroff Chemical Company, Inc. provides custom-blended chemicals and specialty services that improve clients' critical water and process system performance, which helps maximize efficiency of operations and lower costs of operation.

Kroff Chemical's services focus on energy efficiency, regulatory compliance, waste minimization and water reuse, fully automated and integrated chemical applications, and a safety-conscious approach.

With the support of Kroff Chemical Company, Inc., facilities operate with less staff, but they operate safely, efficiently and profitably. Clients focus more on their core competencies and look to Kroff Chemical Company, Inc. to treat, operate and maintain their critical water and process systems.
