Sample Information	Testing Information								Microbiology Testing Information							Other	Additional Testing/Comments		
Sample Name	Boiler Feed Water Analysis ⁵	Boiler Water Analysis ⁵	Condensate Analysis ⁵	Open System Analysis ³	Closed Loop System Analysis ²	Expanded Metals (ppb) ⁴	Standard Water Analysis ¹	Deposit Analysis	ATP (Free and Total)	Total Aerobic Bacteria	Acid Producing Bacteria	Sulfate Reducing Bacteria	Nitrifying Bacteria	Iron Related Bacteria	Algae	Slime Forming Bacteria		Percent Glycol / Freeze Point	FTIR Analysis

¹ Standard Water Analysis Includes:

pH, conductivity, alkalinity, chloride, sulfate, total phosphate, silica
 aluminum, barium, boron, calcium hardness, magnesium hardness, total hardness, copper, iron,
 manganese, molybdenum, potassium, sodium, strontium, zinc

² Closed Loop System Analysis Includes:

Standard Water Analysis, TTA, nitrate, nitrite

³ Open Loop System Analysis Includes:

Standard Water Analysis, TTA, phosphonate

⁴ Expanded Metals (ppb) Includes:

Arsenic, Cadmium, Chromium, Lead, Nickel, Selenium

⁵ Boiler Feed Water Analysis, Boiler Water Analysis, and Condensate Analysis all include Standard Water Analysis

At least 1 quart of water is required per sample. Bottles available upon request.
